General Comments

If the purpose of this study is to present a general briefing on Hungary, it fulfills its purpose.

The manner in which information has been extracted from other sources and condensed to fulfill the report resulted in erroneous statements. The inaccuracies are occasionally in general statements and sometimes in specific data.

There has been no systematic attempt to check all place name spellings and their coordinates. When errors were readily noticed, the correct spelling including the use of Hungarian diacriticals were given. The bibliography was not checked, nor that data obtained from "Airfields and Seaplane Stations of the World". Since the enclosures (except that for telecommunications), annexes, and maps were not among the material available; no comments on these are offered.
